

City of Dunlap Greenways Project

Dunlap, Tennessee

POPULATION: 5,600
SIZE: 4 linear miles
STATUS: Design Development Phase
TYPE: Greenway Master Plan
YEAR: 2010
BUDGET: \$400,000
FUNDING: Federal Highway Administration (FHWA), Tennessee Department of Transportation (TDOT-Transportation Enhancements) and City of Dunlap

Dunlap, TN is located near the center of Sequatchie Valley, a long and narrow valley stretching like a 65-mile (105 km) gash in the Cumberland Plateau in southeastern Tennessee and northeastern Alabama. The Sequatchie River forms the city's southeastern boundary. The plateau's western Sequatchie Valley escarpment, known locally as "Fredonia Mountain," rises over 1,000 feet (300 m) above the valley just west of Dunlap.

The Greenways Master Plan project will provide an interconnected system of paths and walkways that will link several key destinations within the city. With over 13 continuous miles anticipated, residents and visitors will be able to maneuver the city on bicycle or on foot and experience the wealth of beauty and natural scenery that make the valley a special place.
